

I srtonly oppose any cell phone use on the airplanes. As a flight attendant , I already hear people fighting on phones and loudmouths disturbing passengers on the ground. People need to be relaxed and have the chance to rest and stay relaxed onboard, especially in the light of the security threats and 9/11. Please consider the role of flight attendants and their input to this issue. We are the professionals who are there not only for safety (cell phones can jeopardize safety if there are suspected problem people on board in different seats..etcc)..but for the comfort and ease of the passengers journey

Sincerely
Patty O'Neil USAirways
